BARDAHL **DPF CLEANER**

Diesel Particulate Filter Cleaner

To remove soot build up in Diesel Particulate Filter.

THE PROBLEM

DPF Filters have a problem of collecting ash contaminates the filter and will eventually clog pores thereby reducing its efficiency. Many Diesel Engines equipped with a DPF automatically start a regeneration program consisting of the injections of more fuel into the engines to achieve a higher combustion temperature and therefore destroy the buildup of particles that results in unburnt fuel mixing with engine oil in the lower part of engine and thereby causing damage. Regeneration is frequently impossible as most vehicles are city traffic and never get to temperature to burn off the clogging particles.

THE SOLUTION

BARDAHL DPF Cleaner will burn off collected soot in the filter at lower temperature through regeneration process without injecting additional fuel needed and reduce fuel economy and cause fuel dilution in engine oil.

THE BENEFITS

- Reduces soot buildup and filter clogging
- Increases fuel efficiency
- Lower temperature facilitates regeneration of particulate filter and decreases fuel dilution in oil
- It facilitates the regeneration of the particulate filter also if used on urban roads.

DIRECTIONS

Use at every oil change or as needed, Add one bottle to fuel tank prior to filling. One bottle treats up to 24 gallons of diesel fuel. Dispose of any used or unused solution and container in accordance with the local, state and federal regulations.

Product Specifications

Product #	33570
Unit UPC#	0 76906 13011 0
Case UPC#	30076906130111
Pack Size	12x10oz (300 mL)
Dimensions	L x 11" W x 8" H 8.5"
Weight & Cubic ft ³	8.48 lbs / 0.43 ft ³
Color	Amber
Specific Gravity	0.875
Viscosity	N/A
Flash Point	>140.9°F / >60.5°C

R.240801
