# BARDAHL OCTANE BOOSTER

Increases the Rating of Gasoline to Improve Fuel Economy

## THE PROBLEM

Octane rating is a standard measurement of performance that determines how much compression a fuel can withstand before igniting. Inadequate octane in fuel can result in less than complete combustion causing decreased performance and increased emissions. Though newer vehicles are equipped with electronic sensors that adjust the ignition timing, there is still a loss of fuel economy. In older cars, lower octane can cause 'knocking and pinging' that can seriously damage the engine.

## THE SOLUTION

**BARDAHL Octane Booster** increases the gasoline rating number to restore power, enhance performance and improve fuel economy. When added to a full tank it will increase the octane up to 3 numbers, improving the efficiency of the fuel system and the performance of the vehicle.

## THE BENEFITS

- Increases the octane rating of gasoline
- Restores power and enhances performance
- Improves fuel economy lost from electronic sensor adjustments
- Stops knocking, pinging and engine 'run-on' to prolong the life of a vehicle
- Safe to use; will not harm O2 sensor, catalytic converter or other components

## DIRECTIONS

Add one bottle of BARD AHL Octane Booster to the fuel tank before filling it with fuel. One 5 oz bottle treats up to 16 gallons (60L) of gasoline. Dispose of any used or unused solution in accordance with local, state, and federal regulations.

### Product Specifications

Product #	3530
Unit UPC#	0 76906 03530 9
Case UPC#	30076906035300
Pack Size	12x5oz (148 mL)
Dimensions	L x 9.5" W x 5.5" H 8.5"
Weight & Cubic ft <sup>3</sup>	4.7 lbs / 0.26 ft <sup>3</sup>
Color	Light Amber
Specific Gravity	0.856
Viscosity	N/A
Flash Point	>146°F / >63°C
